

Project Design

Phase-I Solution Architecture

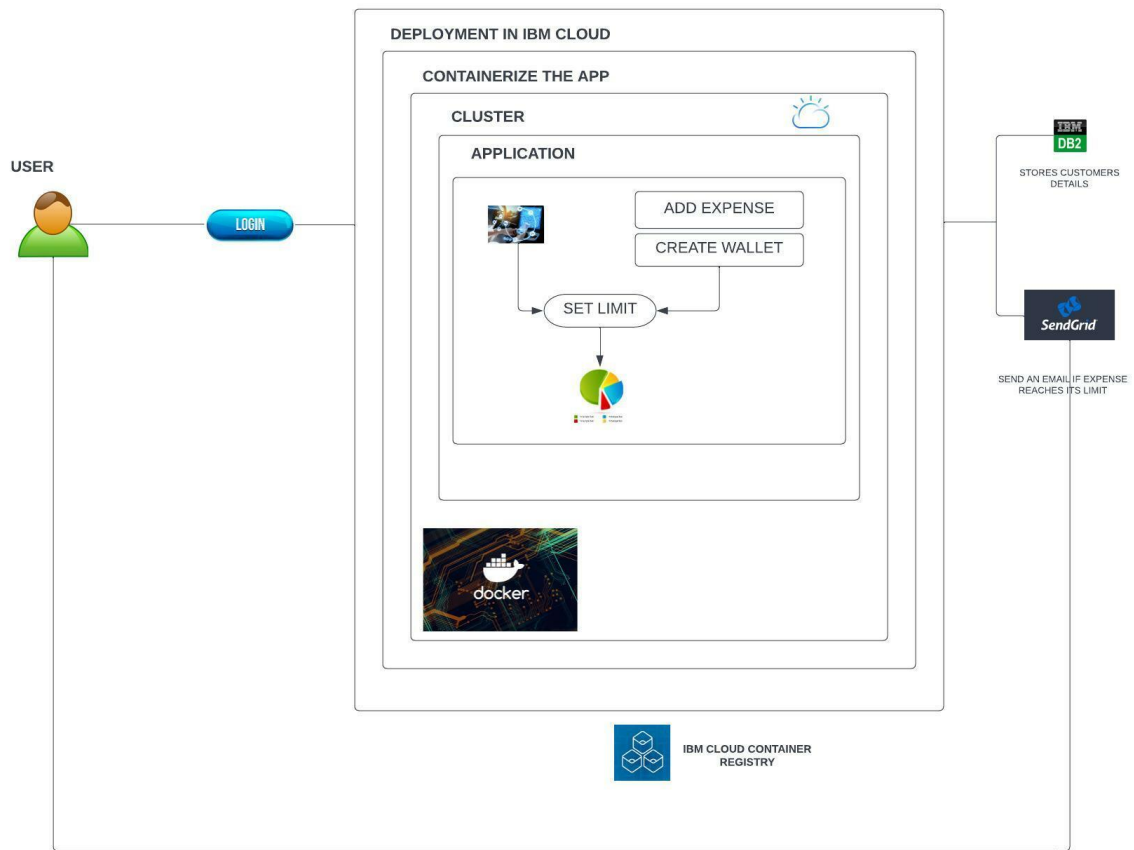

TEAM ID	PNT2022TMID15814
PROJECT NAME	PERSONAL EXPENSE TRACKER APPLICATION
MAXIMUM MARKS	4 MARKS

SOLUTION ARCHITECTURE:

Solution architecture is a complex process — with many sub-processes — that bridge the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
