**MENTOR NAME :** *Mrs.S.SELVI*

**TEAM MEMBERS :**

- *PRIYANKA S (TEAM LEADER)*
- *RAISA A*
- *SNEHA R.S*
- *KALPANAKUMARI S*

### **WEEK 6(26 Sept - 01 Oct 2022):**

Since September 26th, we have created our problem-solution fit document as well as a solution architecture, which we have developed with our team members' creative thinking and new ideas. Our team members have attended the technology training session as per the training calendar.

And the problem-solution has evolved with more creative and customer-satisfying ideas into the fit template and solution architecture, which have been created and uploaded to Github.

Our team members have attempted all the technical training sessions and the mentors have allotted the quiz-3 for week 6 and it has been attended successfully. They have also assigned the third assignment to be completed within a week.

In assignment 3, they have been assigned to do

1.Create a bucket in IBM object storage.

2.Upload 5 images to IBM Object Storage and make them public. write HTML code to display all 5 images.

3.Upload a CSS file to the object storage and use the same CSS using an external link in your HTML page.

4.Design a chatbot using IBM Watson Assistant for a hospital. A user comes with a query to know the branches of that hospital in your city. Submit the web URL of that chat bot as an assignment.

5.Create a Watson assistant service with 10 steps and use 3 conditions in it. Load that script into an HTML page.
